PROFESSIONAL SUMMARY

Detail-oriented E-commerce and Influencer Outreach Virtual Assistant with hands-on experience in online research, lead qualification, product data management, e-commerce workflows, and automation. Experienced in researching and organizing online profiles, evaluating leads against defined criteria, maintaining structured spreadsheets, processing large product datasets, and automating repetitive workflows. Comfortable working with Google Workspace, Microsoft Excel, Make.com, web research, and browser automation tools. Strong attention to detail and organization, with an IT background that allows me to quickly learn new platforms such as Shopify and adapt to structured campaign workflows.

KEY SKILLS

Python Automation | Advanced Excel | SQL & Database Querying | Workflow Automation | AI-Powered Workflows | Data Pipelines | API Integration | Process Improvement | Dashboard Development | Root Cause Analysis

TECH PROFICIENCY

Research & Communication: *Google Workspace, Zoom, Slack, Discord*
Workflow Automation: *Make, Zapier, Python Scripts*
Data & Reporting: *Microsoft Excel, Power Query, Pivot Tables*
AI Tools: *ChatGPT, Gemini, Claude, Copilot*

EDUCATION

Bachelor of Science in Information Technology
Caraga State University - Main Campus | Butuan City, Philippines | 2022 - 2026
Vice-President's Lister (1 semester)
Relevant Coursework: *| Twilio SMS Automation | AI - Integrated Borrowing & Inventory System | Organizational Management | Computer Applications*

RELEVANT EXPERIENCE

Part-Time Automation Developer
Whatnot E-commerce Account | June 2026 - August 2026

- *Developed Python-based automation workflows to streamline client outreach and product-related messaging activities on e-commerce platforms.*
- *Built browser automation and web-scraping workflows using Playwright and Selenium to collect relevant product/user information and automate repetitive messaging tasks.*
- *[Developed Python scripts using Pandas, OpenPyXL, WebDriver Manager, Selenium, and Playwright to process data, interact with web applications, and automate repetitive workflows.*
- *Designed scripts to reduce manual effort involved in identifying relevant users and initiating product-related outreach.*

Supplier Product Data Extraction & Catalog Preparation
E-commerce Product Data • QA • Import Preparation

- *Processed a supplier catalog containing 3,808 products, 6,315 variants, and 6,793 images.*
- *Structured product, variant, and image information for e-commerce catalog preparation.*
- *Performed QA checks covering product identifiers, handles, variants, images, and duplicate records.*
- *Reviewed and separated exceptions requiring additional attention.*
- *Reduced the final held exception set to 19 records for manual review.*
- *Prepared 3,786 products as the proposed import-ready dataset.*

Recruiting Operations & Lead Sourcing Automation

Recruiting • Lead Generation • Data Qualification

- *Built and improved an automated recruiting workflow designed to source, organize, qualify, and manage candidate leads.*
- *Worked with structured lead data and developed processes for deduplication, qualification, role classification, and pipeline management.*
- *Integrated automated data collection and processing workflows to reduce repetitive manual recruiting tasks.*
- *Designed lead-processing logic to identify relevant candidates while separating records by recruiting role and qualification status.*
- *Worked with Make.com, Supabase, Lovable, APIs, and web-based data collection workflows to support the recruiting operation.*
- *Helped prepare the system for larger-volume lead sourcing while maintaining data quality and separation between candidate categories.*

Researcher - Capstone Study

University Center for Culture and the Arts - Caraga State University | November 2025 - May 2026

- *Designed and developed a QR- and image-based recognition system to digitalize the borrowing and inventory management process at CSU-UCCA.*
- *Implemented YOLOv8-based image recognition to support automated identification within the borrowing workflow.*
- *Replaced manual borrowing processes with a digital workflow designed to improve transaction tracking and reduce repetitive data entry.*
- *Developed inventory analytics functionality to provide better visibility into inventory activity, usage, and availability.*
- *Tested the system using real-world borrowing and inventory scenarios and identified opportunities to improve accuracy, usability, and process efficiency.*

REMOTE WORK READINESS

Internet: *Primary: Converge FiberX 100 Mbps | Backup: Globe mobile data hotspot*
Power Backup: *Nearby coworking space as contingency*
Equipment: *Personal laptop (Ryzen 7 - 5000 series) | Noise-cancelling headset*
Availability: *Flexible schedule | Available for US/UK/AU time zones | Open to graveyard shift*

LANGUAGES

English: *Proficient*
Filipino: *Fluent*
